CAMPMEETING SCENE ON COLLEGE CAMPUS.

COLLEGE CALENDAR.

1905	
Fall Term begins	Wednesday, September 6
Fall Term closes	Wednesday, December 20
1906	
Winter Term begins	Wednesday, January 3
Winter Term closes	Wednesday, March 28
Spring Term begins	Wednesday, April 4
Spring Term closes	Wednesday, June 6
Baccalaureate Sermon	Sunday, June 3
Commencement Exercises	Wednesday, June 6

Entrance examinations and registration of students will be held on the first day of each term.

BOARD OF DIRECTORS.

Rev. A. J. Bolster, Chairman,	Auburn, Ill.
Rev. B. Forester, Sec'y,	414 4th St. Baraboo, Wis.
J. W. Emmons, M. D.,	Buchanan, Mich.
W. A. Briggs,	Homewood, Ill.
Mrs. Edgar Bennett,	Mendota, Ill.
Rev. Geo. H. Dewing,	Mineral, Ill.

FACULTY.

NATHAN CROOK TWINING A. B., A. M., Ph. D.
Latin, Greek, Hebrew, French, Higher Mathematics and Metaphysics.

BERT JOSEPH DEAN, B. S.
Science.

MRS. JENNIE MAY TWINING, A B.
German, Higher English and Rhetoric.

BENTON ALBERT KING.
Commercial Department.

ORRIN ROE JENKS, B D.
Principal of the Bible Training Department.

ROBY COLUMBUS ROBBINS, A B.
Instructor in Bible Training Department, in New Testament Greek, and in Hebrew.

JOHN A. WALLACE.
Director of Musical Department.

LAUREN DILLON, B. E.
Department of Expression.

MRS. ETHEL E. ROBBINS.
English and Mathematics.

WINFIELD W. GIBERSON.
Typewriting

Origin.

Mendota College was founded in the year 1893, by the Western Advent Christian Publication Association, and is regularly incorporated according to the laws of the state of Illinois.

Object.

In accordance with the spirit under which it was organized, the College aims to furnish ample facilities for education in the liberal arts, sciences, language and theology, within reach of all who desire it, and at a very low cost. It endeavors to inculcate in the student correct ideas of character and citizenship.

The Governing Body.

The governing body of the institution is a Board of Directors, consisting of six members, elected for a term of three years, by the delegates of the various conferences constituting the W. A. C. P. Association and meeting annually in Mendota.

Location.

Mendota College is conveniently and pleasantly situated in the city of Mendota, LaSalle county, Illinois, eighty-three miles west of Chicago, at the junction of the Chicago, Burlington & Quincy, and Illinois Central railroads. The country around is one of the richest and most prospecous agricultural regions in the West. Mendota is a thriving and prosperous city of about 5,000 inhabitants.

The College is situated in the north part of the city. Its location is a beautiful one, in the middle of a campus, spacious and well shaded, making the surroundings of the College cheerful and attractive. The building is a large brick structure, supplied with city water and lighted by electricity.

Preparatory and Collegiate Department.

The Preparatory courses afford facilities in time and apparatus in advance of regular high school courses.

The college courses, Classical and Scientific, each require four years, and include those studies which long experience has proved to be the best adapted to secure liberal and symmetrical mental development.

Persons not desiring to take an entire course can devote themselves to special subjects, that they are prepared to study, with the regular classes in those subjects.

Students completing either the Preparatory or College course, will be awarded a diploma of graduation.

DESCRIPTION OF COURSES.

The following description of the co-related studies in the various departments furnishes a full explanation of the preceding courses.

ENGLISH.

Three objects are kept in view in this important branch of instruction:

First—The correct use of English as a written and spoken language.

Second—The History of English Literature and the study of English masterpieces.

Third—The History of the English Language and its deveopment.

The work in Rhetoric consists of three terms text book work, and composition.

The work in English Literature will continue for one year, but the ground covered will consist of the English Classics required for entrance to any college, and histories of English and American Literature.

The Study of Words will also be vigorously pursued, one entire term being given to it.

HISTORY.

The course in History has been arranged with the design of making the student acquainted with the development of thought, and the course of events in the past, in order that he may have a clear conception of the chief factors that are shaping human progress at the present time.

The course comprises American, English, French, Grecian, Roman, Ancient, Mediæval, Modern and Consitutional History, Civil Government, and International Law.

LATIN.

The great influence of the Latin language upon the English, in the formation of words, and of Roman civilization upon our own, makes this study of great practical and cultural value to every liberal and educated mind.

It is one of the chief means of promoting the power of expression and a good English style.

The works of Cæsar, Virgil, Cicero, Horace, Tacitus, Sallust and Livy comprise the course.

GREEK.

Liberal provision for the study of the Greek language has been made, on account of its discipline and practical advantages.

The principal works studied are: Xenophon, Herodotus, Homer, Thucydides, Plato, Aristophanes and Sophocles. Special attention will be given to New Testament Greek.

MATHEMATICS AND ASTRONOMY.

The work in this department is made practical and thorough, the aim being to fit the student for practical work, and to give a thorough development of the reasoning powers.

Beginning with Mental Arithmetic the course includes Higher Arithmetic, Elementary and College Algebra, Plane and Spherical Geometry, Plane and Spherical Trigonometry, Conic Sections, Analytical Geometry, and Differential and Integral Calculi.

Both Elementary and Advanced Astronomy are taught.

SCIENCE.

It is the object of this department to give the student a good practical knowledge of each subject taken up, and to supplement the text by actual experiments and practice in laboratory and microscopical work.

It includes Physics, Physiology, Botany, Zoology, Geology, Chemistry, Biology, Logic and Psychology. History of Philosophy, Political Economy, Sociology and Ethics.

Commercial Department.

"I do not object to classical learning; far from it. But I would not have it exclude the living present. Therefore I welcome the business college in the form it has taken in the United States, because it meets an acknowledged want, by affording to young people of only common scholastic attainments, and even the graduates from Harvard and Yale, an opportunity to learn important and indispensable life lessons before they go into the business of life."—Garfield.

The course of study in this department, as given below, contains all branches usually taught in commercial schools and colleges, and is designed to give the greatest possible amount of information in the shortest length of time consistent with good results.

Commerical Law,	Civil Government,
Commercial Arithmetic,	English Grammar,
Penmanship,	Business Forms,
Spelling,	Business Correspondence,
Commercial Geography,	Rhetoric (optional),
Office Work,	Political Economy,

Bookkeeping, complete, including Banking,
Drills in short Methods and Rapid Calculations.

A commercial course does not consist, as many suppose, of merely the study of Bookkeeping. While Bookkeeping forms an important part of the course, there are other studies equally important, and without which a knowledge of the various methods of keeping accounts would be of but little profit. A bookkeeper who does not understand the principles of mathematics involved in keeping his records of transactions would not be worthy of the name and would soon find himself involved in difficulties from which it would be almost impossible for him to extricate himself. A thorough knowledge of Bookkeeping with lack of ability to write a good, clear and rapid business hand, would perhaps enable one to keep his accounts correctly, but in the business world few men will be found who are willing to employ an accountant who cannot keep his books well and neatly. Commercial Law, Commercial Geography, Civil Government, Commercial Correspondence, Business Forms, Spelling and Grammar, are but others of the subjects which a bookkeeper must understand in order to be successful.

BOOKKEEPING.

The work in this branch of study includes both Single and Double Entry Bookkeeping and the methods of changing from one system to the other. Sets of books adapted to the various lines of business as—Retail, Wholesale, General Jobbing, Commission,

Manufacturing, Corporation, Banking, etc.,—are fully explained to the student and actually used by him.

At the beginning of the course each pupil is provided with a cash capital of College Currency and he embarks in business for himself. Merchandise is bought and sold; notes, drafts, checks, receipts, bills, and in short, all kinds of business forms are filled out and handled, and the proper entries made from the actual transaction.

As a further means of bringing the student into contact with actual business transactions, this department is provided with three general offices—College Bank, Merchants' Emporium, and Commercial Exchange. At the first all banking business is done; at the second all merchandise is bought, and at the third all merchandise is sold and all business transacted that does not properly belong to the other two.

In each office a full set of books is kept by the student placed in charge: currency, invoices, notes, drafts, checks and other papers are filled out and transferred—all of which furnish an excellent test of the accuracy, rapidity and ability of the student. The work in each office differs from that done in the others, and every student, before completing the course, will be required to take entire charge of each for a given time.

PENMANSHIP.

Perhaps there is no surer passport to a good paying business position than the ability to write a smooth, rapid, and legible hand. Fully realizing this, penmanship is taught throughout the entire course. Particular attention is paid to plain penmanship, and the system taugh is the medium slant, muscular movement. Plain and ornamental lettering will be taught in connection with the work in penmanship. The use of the automatic shading pen will also be taught to those who wish it.

COMMERCIAL LAW.

To know something of the laws controlling business transactions should be the aim of every person, whether intending to follow business pursuits as a life work or not. No matter what may be his means of obtaining a livelihood, one must know something of the rules of trade to be able to protect his interests against those who are ever ready to take advantage. Commercial law does not pretend to make a lawyer out of any one, but it does present in as clear and concise a manner as possible just those points of law relating to business which every one should know, and which all who follow commercial pursuits must know, in order to be thoroughly successful.

COMMERCIAL ARITHMETIC.

Both Mental and Written Arithmetic are taught in the course. The ability to solve any problem in mathematics must depend on the

power of the mind to retain, to associate, and to reason; and perhaps no branch of study is better adapted to develop the mind along these lines than is Mental Arithmetic.

The work in Mental Arithmetic is followed by Written Arithmetic in which the student is required to become familiar with all the principles used in actual business calculations, and to solve problems similar to those which will occur daily, after he leaves the school-room and enters upon his life work.

Especial attention is given to short methods and rapid calculations. Time is too valuable to waste over long and difficult methods when short and simple ones will accomplish the same result. Not only do short methods save effort but they make work more accurate and enable one to do more in the same time. What the business man of to-day demands is an assistant who is not only honest and conscientious, but rapid and accurate in his work as well.

BOOKS AND SUPPLIES.

None but standard text-books are used in all branches of the course. A supply of books, penmanship paper, etc., is kept on hand and sold to students at prices as near cost as it is possible to sell them. No one is required to buy supplies at the school but most students find it to their intererst to do so.

INDIVIDUAL INSTRUCTION.

The teaching in all of the commercial branches, is largely done by individual instruction; especially is this true in regard to the study of Bookkeeping. This method enables those who possess natural ability, or whose previous education has better qualfied them for the work, to advance as rapidly as they are able without being obliged to accomodate themselves to the progress of others who are not so brilliant or who cannot give so much time to the work. Each pupil will be given the assistance he needs, and all will be encouraged to advance as rapidly as possible.

TIME REQUIRED.

Our course as now arranged cannot be completed in less time than one school year of nine months unless much of the work required has been done before entering. Those students who have already completed a good high school course, will not be required to repeat such studies as Spelling, English Grammar and Civil Government. Should pupils presenting such credits find that their time will permit, advanced work may be taken which will be of great benefit to any one.

DIPLOMAS.

Every student completing the business course will be awarded a

diploma of honorable graduation. This will be given, however, to those only, who have completed, in a satisfactory manner, the work in every study prescribed for the course. A reasonable charge will be made to cover cost of diploma and work of filling out the same.

SITUATIONS.

We do not guarantee situations to all who may complete the prescribed course of study: neither do other responsible institutons. To make such a promise would be to agree to find positions for all who were mentally competent, regardless of character. We can recommend only those who show themselves worthy.

Offers of "Situations Guaranteed," are but traps to catch students. Many of the institutions making the above offer, do no more toward finding or furnishing positions than to watch the daily papers and when they find an advertisement, "Accountant Wanted," they tell the pupil to make application. If the applcation is not accepted they tell him, "We have found you a position, but if you are not accepted it is not our fault." Our ideas of right and wrong will not permit us to do that way, but we will do all in our power to assist worthy pupils to good paying positions.

TYPEWRITING.

Shorthand has been discontinued but provision has been made for giving instruction in Typewriting to those who wish it. Both the "Touch" and "Sight" methods are taught but the former is always strongly recommended.

Theological Department.

THE BIBLE TRAINING SCHOOL.

As a religious people we are more interested in this department than in any other connected with the college.

Therefore, we have not only made it free, but we offer to its regular students (those who intend on leaving school to enter upon the active duties of the ministry) the advantage of pursuing such studies in the Preparatory Course as their needs may require; so that while gaining a good knowledge of the Bible, and being trained in the best method of performing the sacred duties of the Christian minister, they may secure that literary and general training so helpful in their holy calling.

ADVANTAGES.

1. In the above provision we find an inducement to students for the ministry to attend this school rather than any other where the school is not associated with a college.

2. In connection with the college there is the help of a library (including the entire library of the late Prof. N. P. Cook), a Y. M. C. A., and a Literary Society.

3. There is, near the College, an Advent Christian church, which, with its Sunday-school, Young People's Society of Loyal Workers, and regular church appointments, together with services at various places in the surrounding country, furnishes opportunities to the students for exercising their spiritual gifts and for labor in missionary work.

While close attention will be given to the mental and physical training (or physical culture) of the students, and to their development in morals and manners, more especial attention will be given to their spiritual education, whereby, endowed with divine grace and energy, they may be able to preach "not with enticing words of man's wisdom, but in demonstration of the Spirit and of power."

THE BIBLE—THE TEXT BOOK.

Since this department is known as the Bible Training School, the Bible above all other books will be the text book, and the reading and study of the Bible, beyond the reading and study of all other books, will receive special consideration.

THE CLASSES.

The students will be divided into three classes, junior, middlers, and seniors.

COURSE OF INSTRUCTION.

The Bible Training Department offers the following courses of study:

I. THE OLD TESTAMENT.

The basis of this work is the study of the Hebrew language. Students take a two years' course in Hebrew, reading the Pentateuch, portions of the Psalms, and the Prophets.

One year is spent in studying the great historic periods of the Old Testament. The text book is the English Bible, and this study is open to students who have not a knowledge of Hebrew.

The study of prophecy occupies an important place. Special attention is given to the work and writings of the prophets. Our endeavor will be to give a prominent place to the study of the prophecy of Daniel.

Electives. 1. Aramaic, 20 hours, with special attention to the Aramaic portions of the book of Daniel. 2. Syriac, 20 hours. 3. Assyrian, 40 hours. Study of the language and history of its literature. These electives are offered to meet the need of those who wish to do thorough, critical work in the Old Testament.

II. THE NEW TESTAMENT.

The basis of New Testament study is a two years' course in the Greek language. One term is spent in New Testament exegesis, one term in the Life of Christ and one term in Apostolic History.

Electives. Aside from the prescribed work in the New Testament, several electives are offered: 1. The Epistles of the Imprisonment, history and doctrine. 2. The Catholic Epistles, history and doctrine. 3. Epistle to the Hebrews, authorship and teaching.

III. SYSTEMATIC THEOLOGY.

The supporters of the College are deeply interested in the great doctrines of the Bible. It is our aim to give the students of this Department thorough instruction in the theology of the Bible. To do this it is necessary to study the teaching of the Bible concerning God, sin, Christ, the Holy Spirit, immortality, future punishment, the saint's inheritance, the signs of the times and so forth.

Attention will be given to the history of doctrine. In the study of eschatology, the aim will be to get the students thoroughly familiar with the best literature on this subject.

In Apologetics the purpose will be to present a systematic apologetic in view of the main controversies of the present time. This involves a study of miracles, the resurrection of Christ, and the Christian view of God and redemption.

IV. CHURCH HISTORY.

This course will cover the history of the church from the first

advent of our Lord to the present time. Three terms are required to complete the course. Fisher's "History of the Christian Church" is used as a text book; but the students will be required to do a large amount of reference work for the purpose of getting back as much as possible to the original sources.

Electives: 1. History of the Jewish People during the Maccabean and Roman Periods. 2. History of Missions. 3. History of Adventism. 4. History of Doctrine from the Reformation to the present time.

V. HOMILETICS.

The minister must know how to preach. To assist the student in preparing for pulpit work, two terms are spent in the study of homiletics. "The Preparation and Delivery of Sermons" by Dr. J. A. Broadus is used as a text book. One term is spent in studying the history of preaching.

Sermons will be preached by members of the class. These are criticised in public by the class, and by the instructor in charge, both publicly and in private.

VI. PASTORAL THEOLOGY.

The minister must not only be a preacher, but he must be a pastor also. The course in pastoral theology aims to make the student familiar with the needs of the pastoral office and to so fit him for his work that he will properly feed the flock of God. Students are made familiar with the literature bearing on this subject, and lectures on pastoral duties will be given.

VII. EXPRESSION.

The course in Expression will aim to develop in the student naturalness and ease in the delivery of sermons and in general conversation. Special attention will be given to Scripture and hymn reading. Voice culture and gesture will also form an important part of the study. It is especially required that each graduate from this department pass examination in this branch.

REQUIREMENTS FOR GRADUATION.

Three years will be required to complete the above course. Diplomas will be granted only to those who have completed the theological course, and in addition have had the preparatory course or its equivalent.

Admission to the Bible Training School requires satisfactory evidence required for admission into the Preparatory Courses, and acceptable testimonials of good character.

A cordial invitation to attend this school is hereby extended, not only to all who desire to fit themselves for evangelistic or pastoral

work, but also to any who may wish more fully to qualify themselves for Sunday-school or mission work. Moreover for the mutual benefit and satisfaction of both students and teachers, a special request is made to all so to arrange their affairs if possible, as to be present promptly at the opening, and to remain until the close, of the college year. Particularly is this needful if one intends to complete the prescribed theological course.

With hearts deeply grateful to Almighty God in thankful acknowledgment of the donation of friends, we herewith renew our appeal for help; especially is it needful thus to do in carrying on the work of this department, inasmuch as the tuition is entirely free and the expense must be met by voluntary contributions. Let us all bear in mind, "There is that scattereth, and yet increaseth; and there is that withholdeth more than is meet, but it tendeth to poverty."

DEPARTMENT OF MUSIC

This department is under the same general supervision as the other departments of Mendota College. Its members are subject to the same regulations as the other students in the institution, thus furnishing an education in music, under the best of Christian influences.

All students, upon entering the Music Department, must spend most of the first term in technical work; and if the previous instruction has been of inferior quality; some time is often required to form habits of mental concentration, and to overcome the bad effects of careless practice.

The studies given below serve to indicate the technical difficulties of each course, and equvalents are frequently substituted, according to the judgment of the instructor.

Students may enter any grade for which they are found qualified, and the work is planned to suit the individual needs of the pupil.

Two courses of study are offered.

The first is designed to prepare for elementary teaching. On the completion of this course a certificate will be given.

The second includes a complete college course, on the completion of which a diploma will be given.

PIANO.

ELEMENTARY GRADES.

Kohler op. 190.
Easy studies by Gurlitt, Biehl, Czerny and Duvernoy.
Major Scales and Arpeggios.
Sonatinas of Clementi and Kuhlau.
Mathew's Selected Studies.
Shumann-Album for the young. op. 68.
Czerny. Studies in Velocity. Book I.
Heller. op. 47. Book I.
Minor Scales and Arpeggios.

TEACHER'S CERTIFICATE COURSE.

Mathews' Select Studies.
Loeschorn Studies.
Heller-op. 47. Book II.
Czerny-Studies in Velocity Books II and III.
Mason-School of Octaves.
Bertini-op. 29 and 32.
Heller-op. 46 and 45.

Cramers's 50 Selected Studies. Parts I and II.
Bach-Inventions.
Sonatas by Haydn, Mozart, Krause, Clementi, Beethoven and others.

GRADUATING COURSE.

Cramer-50 Selected Studies. Parts III and IV.
Heller-op. 16. The Acts of Phrasing.
Kullak. Octave Studies.
Moschelles Etudes. op. 70.
Clementi's Gradus.
Bach-well-tempered Clavicord.
Schumann, Henselt, Chopin, etc.

VOCAL.

TEACHER'S CERTIFICATE COURSE.

Introductory Lessons in Voice Culture. Frederick W. Root.
Standard Graded Course of Singing. Herbert W. Greene.
Voice Training Exercises. Behnke and Pearce.
Sieber's Foundation Studies.
Sieber's Eight Measure Exercises.
Concone's Fifty Lessons.
Nava-Elements of Vocalization.
Bordogni Art of Phrasing. Expression.

COLLEGE COURSE.

Bordogni—Thirty-six Volcalizes.
Panofka—Singer's Daily Exercises.
Marchesi—Studies in Style.
Each set of studies is not followed out in full, but the special need of the student is considered.
The best standard and classic songs are used at discretion.

THE CABINET ORGAN.

So well adapted to many styles of music, is taught with as great care as the Piano.
A well graded course is arranged for it.

HARMONY.

At least one year of Harmony is required of all students in musical courses.

FREE ADVANTAGES.

1. College Library.
2. Pupil's Recitals.
3. Systematic courses of reading in Musical Literature are a ranged for those who have the leisure to pursue them.

For further information apply to J. A. Wallace, Director

DEPARTMENT OF EXPRESSION.

DEFINITION.

Expression, which has been defined as the art of life, includes all that the voice may do or the body represent.

BENIFITS.

There are few courses of training capable of benefiting a person so much as the study of this art. If one does not have in view any special use to which to put it, its general benefits often exceed other kinds of education; but to those who contemplate entering the wide field of public life a knowledge of this art is simply indispensable.

DIVISIONS.

The subject will be developed under the following subdivisions: Human Speech, English Language, Voice Culture, Rendition, Human Nature, Grace and Entertaining.

METHODS OF TEACHING.

Our method of instruction discourages the old idea of coaching or teaching by imitation—"Say this and do it as I do it,"—the teacher showing how it is done and the pupil trying to do it in that way. Such a course is fatal to the genius, talent and naturalness of the student. Our aim is to develop the individuality of the pupil and to seek to restore to him that childlike simplicity of rendition from which he has departed by improper habits of voice and action.

TIME FOR STUDY.

The time devoted to gaining a knowledge of the theory of the art will consist of one hour per week during the school year; the time for practice will include all of the waking hours of the student, as there is not an hour of the day in the life of an active pupil in which the principles of this art may not be put into practice with profit.

ADMISSION.

The class is open to all applicants and terms of instruction will be made known upon request.

General Information

ATTENDANCE AND DISCIPLINE.

The Board of Education offers the privileges of the College to all properly qualified persons who seek them. But the College has no place in its class rooms for those who are idle and dissipated. Young men and young women are expected to show themselves gentlemen and ladies at all times.

Experience has shown that a minute and rigorous code of rules is quite unnecessary here. The following statements may suffice.

Absence and tardiness must be excused to the instructor in charge; repeated and persistent cases are referred to the president.

RELIGIOUS EXERCISES.

Devotional exercises consisting of singing, reading the Scriptures, and prayer, are held daily in the college chapel. All students living in the college or near it, and all other students whose duties require them to be at any college exercise during the hour immediately preceding or following chapel services, are required to attend these exercises.

GOVERNMENT.

The government is vested in the faculty and president. It is the aim as far as possible to develop the highest manhood and womanhood. Good conduct and faithful work are required.

To secure these ends appeal is made to the honor and moral sense of the student.

The character, moral conduct, and social relations of the students in the College will be kindly guarded by the president.

Great care will be taken that the minds of the students are not distracted by frequent or objectional entertainments.

INSTRUCTION.

The instruction in all departments is thorough and practical. The aim is to stimulate individual exertion, and afford the student the best discipline in habits of independent thinking. The class-room work is carried on by means of recitations from the best text-books, free discussion in class, presentation of theses, courses of reading on special topics supplementary to the subjects in class, outlines and notes, and frequent reviews and examinations.

ADMISSION.

The College is open to students of both sexes.

Candidates must bring testimonials of good moral character, and

if from other institutions, must present certificates of honorable dismissal. No person will be received under fourteen years of age, except by special arrangement.

Persons desiring admission to advanced classes will be required to pass examination upon the preceding work of the course, or bring certificates of having passed satisfactory examinations upon them in some accredited school.

A certificate of character or letter of recommendation will be required of each student, before admission to classes.

Such certificate may be furnished by the applicant's pastor, or last teacher.

TIME TO ENTER.

Students can enter at any time, but experience has fully demonstrated that it is greatly to the advantage of the student to be present at the beginning of the term. This is important for several reasons: the student can then receive the proper classification, be on equal footing with his classmates, and pursue studies that are continued throughout the year and cannot be repeated.

New studies are commenced at the beginning of terms.

EXAMINATIONS.

Examinations are held from time to time as it is thought necessary and advantageous to the students. At the discretion of the teacher, other work assigned by him may be received as substitute for an examination.

Promotions to advanced standing are made upon the basis of satisfactory examinations in the studies pursued or the performance of such special work as the teacher may direct.

Unexcused absence from any regular examination is construed as a failure therein.

A statement of the scholarship of each student will be sent to his parent or guardian at the close of each term, if so desired.

COLLEGE SOCIETIES.

There are several societies and clubs in full operation.

Both ladies and gentlemen have each a debating society in full working order.

Questions of public interest both secular and religious, are freely discussed.

As these societies are governed by a Constitution and Rules of Order, the young people learn both how to rule and how to be ruled.

A Literary Society was formed in the early days of the college, and is still kept up.

The young people, both ladies and gentlemen, meet once per

week and respond to a programme previously prepared, which affords a weekly feast for all concerned.

Not unfrequently the public is invited to listen to music, orations, essays, papers, etc.

The characteristic features being confined to literary topics, become quite often, most deeply interesting and very profitable to both student and friends.

We hope and expect no student will lose the benefits afforded by these forensic exercises.

LIBRARIES.

The regular College Library contains over 1200 volumes of valuable books of reference, and other books of inestimable importance to all who love to read a good book.

Bible Training students will find a well selected library also in their room, numbering about 400 volumes. Also the scientific room is supplied with a library containing volumes of science, travel, etc.

Students also have access to the city "Graves' Library," contain ing over 6000 volumes, embracing works on art, biography, travel, ience, ethics, literature, history, etc.

A fine library building of stone, with a fine dome capping the structure, has recently been completed.

It results from a donation of our worthy and noted citizen, Andrew Carnegie, a native of Dunfermline, Scotland, but now a prominent and famous citizen of our native land.

His cash donation of ten thousand dollars, together with $1200 voted by the city council, enabled the Library Board to construct and finish the building.

READING ROOM.

In order that the students may be informed upon current events, and the progress in Science, Literature, History and Art, a large and pleasant room has been placed at their disposal and supplied with magazines and papers.

LABORATORY AND APPARATUS.

The Ames' Chemical and Physical Laboratories have been equipped with apparatus and material sufficient to teach these sciences in a most thorough and satisfactory manner. Compound microscopes, slides, a skeleton, etc., grealty facilitate the study of Biology. A projecting microscope is also used for class demonmstrations.

Through the generosity of our Brother Z. F. Ames the purchase of a large amount of new apparatus during the past year has been made possible. In all over one hundred forty dollars has been ex-

pended. The largest and most valuable piece purchased is a fine imported spectrometer and goniometer costing nearly eighty dollars. This instrument is for use in connection with the work in Astronomy, Physics, and Chemistry. Other additions include two combined volt-ammeters, a d'Arsonval galvanometer, a telegraphic relay and numerous small pieces of physical and chemical apparatus besides considerable material for use in experimenting.

MUSEUM.

Through the efforts of friends of the College, a fine cabinet of shells, fossils, minerals and curios has been collected. These specimens, many of which are of great value, have been classified and arranged in a room set apart for the purpose.

It is requested that those who have so kindly aided in the past, and others, continue to add to the collection; and that, as far as possible, articles sent be described, giving time of collection, place secured and name of donor.

BOARDING.

Good wholesome board is furnished by the College at $2.00 a week. Private board can be secured by those who desire it.

ROOMS.

Furnished rooms can be had in the College for 40 and 50 cents a week per student.

Furnished rooms in private families can be had in the vicinity of the College if desired.

DORMITORY.

A large and conveniently arranged brick building near the College grounds has recently been purchased and fitted up for a ladies' dormitory. This building is in charge of a matron, who carefuly guards the welfare of those placed under her care.

EXPENSES.

The College year comprises thirty-six weeks. All tuition is payable in advance. No tuition will be refunded for less than one-half of a term, and then only when reasons for leaving the institution are adjudged satisfactory by the president.

Lights and fuel at cost.

Tuition in Bible Training School, free.

Junior year preparatory course, $25.00.

Middle year preparatory course, $30.00.

Senior year preparatory course, $35.00.

Commercial course per year, $30.00.

For less than a full term, $1.00 per week.

Typewriting, $10.00.

College courses per year, $40.00.

Chemical labratory expenses, $1.00 per term and breakage.

Physical labratory expenses, $1.00 per term and breakage.

Registration fee, 25 cents per term.

For use of typewriter, $1.00 per month.

A reasonable charge will be made for diplomas in each department.

Books for all departments will be furnished at the College book store.

No incidental expenses.

Terms: Cash in advance per term or year.

MUSIC.

Not less than two lessons per week are required in all the branches of this course.

Piano, voice, organ, per year, $50.00; or by the school term as follows.

Fall term fifteen weeks, two 45 minute lessons per week, $22.50; or two 30 minute lessons per week, $15.00.

Winter term twelve weeks, two 45 minute lessons per week, $18.00; or two 30 minute lessons per week, $12.00.

Spring term nine weeks, two 45 minute lessons per week, $13.50; or two 30 minute lessons per week, $9.00.

Special lessons in any branch, $1.00.

Harmony (in classes), per fall term, $7.50.

Harmony (in classes), per winter term, $6.00.

Harmony (in classes), per spring term, $4.50.

All class lessons are one hour long.

Piano rent, one hour daily, per week, 25 cents. Each additonal hour 20 cents.

Instruction in the Analysis and History of Music, Notation, and Chorus classes will be given free to students of the musical department. For other students, 50 cents per term.

CLASSIFICATION OF STUDENTS

For 1905 and 1906.

COLLEGE DEPARTMENT.

ANCIENT CLASSICAL COURSE

FRESHMAN.

Hanaford, Roscoe C.

SOPHOMORE.

Wallace, M. Ruth.

JUNIOR.

Pollard, Harry M.

FIRST PREPARATORY.

Brown, Fred
Fraley, Solomon
King, Zula
Kenny, T. Coleta
Keepers, John B.
Loomis, Walter T.
Trigg, Osborne
Costley, Daniel J.

SECOND PREPARATORY.

Clark, Herman
Lewis, Pearl A.
Neslund, Jno. W.

THIRD PREPARATORY.

Brandt, Anna
Giberson, Winfield W.
Gurney, Frank H.
Kess, John E.
Dick, Blanche.

SCIENTIFIC COURSE

FRESHMAN.

Hanaford, Roscoe C.

JUNIOR.

Button, Ama Zader
Shatto, Ethel R.

FIRST PREPARATORY.

Meigs, Grace
Fraley, Wm. M

SECOND PREPARATORY.

Kess, Mrs. John E.
Monson, Ben H.
Foster, John
Harding, Edith V.

THIRD PREPARATORY.

Hanson, Harry Louis.

BIBLE TRAINING COURSE

SENIORS.

Dick, Blanche
Gurney, Frank H.
Kess, John E.

MIDDLERS,

Giberson, Winfield W.
